

New regulation for Polyurethane products

Dear all,

As previous communication, the European Authorities under **REACH** adopted a new restriction which requires [training](#) prior to use products which contain diisocyanates.

Starting from **24 August 2023** this training will be mandatory for professional and industrial users of **adhesives with a total concentration of monomeric diisocyanate of ≥ 0.1 %**.

Essential information in the scheme below:

The **training** is available online on [ISOPA website](#) or can be done face-to-face with accredited trainers (more information on the official [FEICA brochure](#)).

The price depends on the way you attended the training: the cost online is fixed at 5,00€ for every attender while face-to-face is up to the accredited trainers.

On-line training

To access the online training please go to in [ISOPA website](#) at and select “**Adhesives and sealants**” category.

A section with indication on each training will appear and you are able to select the one best suited for you or your operators and register with personal and company data.

The duration of each online training is approximately one hour and a half with a final test which allows you to download a certificate of successfully completed training, which is valid for 5 years.

Free of charge with our voucher

As this restriction is intended to ensure that all workers who come into direct contact with the substances are both informed and trained to assess the risks, we have decided to share our voucher to give you the opportunity to have the training free of charge.

Please don't hesitate to contact us at marketing@duranteadesivi.com to receive the relevant code to enter at the payment page.

Which products are involved in this restriction?

For Durante Adesivi adhesives you can find the indication of the training reported on each product packaging label or in section 2 of our Safety Data Sheet (SDS).

See below:

On packaging label:

"As from 24 August 2023 adequate training is required before industrial or professional use. Further information at: feica.eu/Puinfo"

[ITA] A partire dal 24 agosto 2023 è richiesta una formazione adeguata prima dell'uso industriale o professionale. Ulteriori informazioni su: feica.eu/Puinfo
 [ENG] As from 24 August 2023 adequate training is required before industrial or professional use. Further information at: feica.eu/Puinfo
 [POL] Od 24 sierpnia 2023 r. wymagane jest odpowiednie przeszkolenie przed zastosowaniem przemysłowym lub zawodowym. Więcej informacji na: feica.eu/Puinfo

In SDS section 2

Special provisions according to Annex XVII of REACH and subsequent amendments: As from 24 August 2023 adequate training is required before industrial or professional use.

SECTION 3: Composition/Information on ingredients
3.1. Substances
3.2. Mixtures
 Mixture identification: DUOTERM PU 115
Hazardous components within the meaning of the CLP regulation and related classification:

Qty	Name	Ident. Numbr.	Classification	Registration Number
45x<5 %	4,4'-methylenediphenyl diisocyanate	CAS:101-68-8 EC:202-966-0 Index:615-005-00-9	Skin Irrit. 2, H315 Eye Irrit. 2, H319 STOT SE 3, H335 Resp. Sens. 1, H338 Derc. 2, H351 STOT RE 2, H373 Skin Sens. 1, H317 Acute Tox. 4, H332	01-2119457014-47
0,55x<1 %	4-(1-Methyl-1-phenylethyl)-N-[4-(1-methyl-1-phenylethyl)phenyl]aniline	CAS:10081-67-1 EC:233-215-9	Skin Sens. 1, H317; Aquatic Chronic 4, H413	01-2119967418-24

SECTION 4: First aid measures
4.1. Description of first aid measures
 In case of skin contact:
 In case of contact with melted product, cool immediately with cold water. Do not remove the product adhering to the skin. Consult a doctor.
 Immediately take off all contaminated clothing.
 Areas of the body that have - or are only even suspected of having - come into contact with the product must be rinsed immediately with plenty of running water and possibly with soap.
 Wash thoroughly the body (shower or bath).
 Remove contaminated clothing immediately and dispose off safely.
 In case of eye contact:
 In case of contact with melted product, cool immediately with cold water. Consult a doctor.
 Wash immediately with water.
 In case of ingestion:
 Do not induce vomiting, get medical attention showing the SDS and label hazardous.
 Date: 1/10/2023 Production Name: DUOTERM PU 115 Page: 2 of 11

Since this specific training will be required for all industrial and professional people using or exposed to the specific products already mentioned, we want, with this communication, make sure you are ready in case you receive an inspection visit from REACH authorities after August the 24th 2023.

Do you still have doubts about this training?

To have more information contact us at marketing@duranteadesivi.com, visit [FEICA website](#) or check the scheme below:

For any other information or requests, please do not hesitate to contact us.

Our team of experts will be glad to answer all your questions!
